## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Gatto teaches a method and corresponding system for analyzing analyst estimates performance, which consists of measuring and tracking the past performance of security analyst's earnings estimates. A method and database are provided to give the historical data relating to the security analyst earnings estimates predictions. The user may define a model to automatically create estimates wherein an improved prediction of quantity being estimated is obtained.

Although Gatto teaches a method and corresponding system for analyzing analyst performance, Gatto does not teach "wherein the price charged by the broker for each transaction represents the broker's commission and the price statistics and the comparative price statistics are statistics on the broker's commissions".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
